

QUICK RELIEF FOR CATS AND DOGS

- A fast-acting, easy-to-administer liquid that provides immediate G.I. support for cats and dogs.
- **Quick Relief** contains a specialized yeast extract rich in mannan oligosaccharides derived from the cell wall of yeast (from *Saccharomyces cerevisiae* and brewers dried yeast), Beta-glucans, probiotics (including: *Bacillus subtilis*, mixed lactic acid bacteria, *Enterococcus faecium*), fungal-derived enzymes from *Aspergillus oryzae*, and B Vitamins, which work together as a fast-acting product to normalize the G.I. tract.
- **Recommended for:**
 - ☐ Loose stool and other G.I. health issues
 - ☐ Garbage gut, nervous gut, and food sensitivities
 - ☐ Old age (less digestive enzymes)
 - ☐ Malnutrition
 - ☐ Stress (acute or chronic)
 - ☐ Quickly normalizing digestion
 - ☐ Removal of unwanted materials from the gut
 - ☐ Balanced microflora levels - supports naturally occurring beneficial flora and supports the probiotics in the formula
 - ☐ G.I. tract integrity support
 - ☐ G.I. tract detoxification
- Most animals respond within 24 hours which makes it an “immediate care” product for acute G.I. tract problems.
- **Quick Relief** contains a specialized yeast extract that is rich in mannan oligosaccharides (MOS). MOS is a special type of complex polysaccharide that offers binding sites to unwanted sugar seeking bacteria and microorganisms and then carries them out of the body. MOS also supports immune system functions for optimal gut health. MOS provides more binding sites than FOS (Fructo Oligosaccharides) and MOS is more efficient in removing unwanted bacteria than FOS. Beta-glucans are polysaccharides that act as antioxidants and support the immune system.
- **Quick Relief** contains probiotics including beneficial microbes like: *Bacillus subtilis*, Mixed Lactic Acid Bacteria, *Enterococcus faecium* that helps re-establish balanced microflora levels in the gut. They also encourage the growth of helpful bacteria, help restore proper water level in the gut, and limit the proliferation of unwanted microorganisms in the G.I. tract.
- Fungal derived enzymes from *Aspergillus oryzae* provide both protease and amylase enzymes to help break down proteins and starches so that digestion is more normalized, leading to improved digestion, better assimilation of factors from the diet, and reduced stress on the G.I. mucosa.
- Vitamins work synergistically with the probiotics to support the growth of the naturally-occurring beneficial microbial population in the animal’s gut. This causes a quicker response and helps to reduce stress on the G.I. mucosa. Riboflavin (B2) is required for proper digestion and gut health; Vitamin B6 (Pyridoxine) for proper immune function and helps to transport potassium (an electrolyte which is often lost during bouts of diarrhea) into cells; and Vitamin B5 (Pantothenic Acid) helps convert fats, carbohydrates and protein into energy.
- **Directions For Use:**
Shake well. Give recommended serving listed below until results occur.
Up to 10 lbs: Give 1 1/4 tsp 2 times daily.
11 to 20 lbs: Give 1 1/4 tsp 3 times daily.
21 to 30 lbs: Give 2 1/2 tsp 3 times daily.
31 to 50 lbs: Give 4 tsp 3 times daily.
51 lbs and over give 5 tsp 3 times daily.
- **Quick Relief for Cats**
070C967.004 (3.8 oz, 112 ml)
- **Quick Relief for Dogs**
0700967.004 (3.8 oz, 112 ml)

QUICK RELIEF FOR DOGS & CATS	
Active Ingredients Per 1 1/4 tsp:	
Beta Glucan	779 mg
Pantothenic Acid	4.85 mg
Pyridoxine HCl (Vitamin B6)	1.15 mg
Riboflavin (Vitamin B2)	0.46 mg
Mixed Lactic Acid Bacteria Blend	6 x 10 ⁶ CFU
Lactobacillus acidophilus, Enterococcus faecium, Lactobacillus casei, Lactobacillus plantarum, Aspergillus niger, Aspergillus oryzae	
Saccharomyces cerevisiae	1.56 x 10 ⁶ CFU
Bacillus subtilis	1.74 x 10 ⁵ CFU
Aspergillus oryzae	6 x 10 ⁴ CFU
Inactive Ingredients: cornstarch, glucose, glycerin, glycerol esters, guar gum, lecithin, maltodextrins, mucilage, silicon dioxide, soybean oil.
