

UT SUPPORT FOR CATS

Supports Healthy Urinary Tract Function

UT SUPPORT contains ingredients to support a healthy urinary tract.

UT SUPPORT helps to:

- Maintain proper urinary tract function
- Maintain normal pH which may reduce the likelihood of crystal formation.
- Support immune system function.

ABOUT THE FORMULA

- **N-Acetyl Glucosamine** is an amino sugar that is an essential building block for glycoproteins and glycosaminoglycans. The glycoprotein layer in the mucosal lining of the urinary tract has a high content of N-Acetyl Glucosamine. N-Acetyl Glucosamine supports the function and structure of this glycoprotein layer.
- **D-Mannose** helps maintain a healthy urinary tract. In the urinary tract, sugar-seeking bacteria preferentially attach to D-Mannose and are expelled in the urine. Although it is a naturally-occurring sugar, it's not converted

FUN-SHAPED CHEWS

to glycogen or stored in the liver. Therefore mannose can be used in diabetic cats.

- **Cranberry Extract** helps cleanse the urinary tract. It contains proanthocyanidins, which are potent antioxidants that support the urinary tract. Cranberry is a natural deodorizer decreasing the strong smell of ammonia in urine.
- **Bromelain** is a proteolytic enzyme that helps support the lining and comfort in the urinary tract.

Directions for Use:

Give 1 chew, twice daily.

Active Ingredients Per Approximately 1 Chew:

N-Acetyl Glucosamine (Shrimp and Crab)	100 mg
D-Mannose	50 mg
Bromelain	50 mg
Cranberry Extract	50 mg

Inactive Ingredients: brewers yeast, chicken liver flavor, citric acid, corn oil, glycerin, mixed tocopherols, propionic acid, proprietary blend (maltodextrin, sodium alginate and calcium sulfate), rosemary extract, silicon dioxide, soy lecithin, vegetable oil, whey.
