

# SCOOT BARS FOR DOGS

SUPPORTS FECAL VOLUME AND HEALTHY ANAL GLAND FUNCTION

## WHY IT WORKS

- + **Larch Tree Extract** – Supports the immune system as well as promote a healthy balance of beneficial bacteria
- + **Digestion Resistant Maltodextrin** – A source of fiber that promotes a clean and healthy digestive tract
- + **Pumpkin Powder** – Rich source of dietary fiber that maintains normal stool consistency and elimination

**SCOOT BARS** are a fiber product designed to support fecal volume and healthy anal gland function.

Unlike canned pumpkin or pumpkin treats, **SCOOT BARS** provides immune, digestive and colonic support.

**SCOOT BARS** are great tasting, easy for your pet to digest and more gentle on the system than other fiber products which is important when adding fiber to your pet's diet.

### SCOOT BARS PROVIDES THREE SOURCES OF FIBER:

- + **Larch Tree Extract:** has been shown to support the immune system as well as promote the production of beneficial bacteria.

- + **Digestion Resistant Maltodextrin:** is a soluble fiber that supports fecal volume and regularity.

- + **Pumpkin powder:** is a great source of fiber.

Providing digestive and colonic support is important to your pet's overall health because constipation, anal sacs overload or infrequent bowel movements can contribute not only to anal gland agitation but also irritation of the skin or ears.

**SCOOT BARS** are designed to supply your pet with the necessary levels of fiber to produce fecal quality that can break this smelly cycle.

### Product Facts:

#### Active Ingredients Per Bar:

Proprietary Pumpkin Blend . . . . . 2800 mg  
(larch tree (*Larix laricina*) extract, digestion resistant maltodextrin and pumpkin powder)
