

BREATH BITES FOR DOGS

A DAILY FORMULA TO SUPPORT FRESH BREATH AND HEALTHY GI FUNCTION

WHY IT WORKS

- ⊕ **Spirulina** – A source of chlorophyll, has a deodorizing and detoxifying effect
- ⊕ **Parsley** – Another excellent source of chlorophyll
- ⊕ **Yucca Extract** – Reduces odors by altering the production or availability of hydrogen sulfide in the gut

WITH NATURAL DEODORIZERS

BREATH BITES combines specific factors that help to improve fecal quality, reduce the frequency of flatulence, promote healthy blood filtration, and freshen breath. What makes **BREATH BITES** unique is the inclusion of the Champex™ brand Champignon Mushroom Extract which has been extensively studied for its ability to suppress odor-causing chemicals in the intestines. Champex™ is a detoxifying and odor-reducing extract of champignon mushrooms that targets odors where they originate.

BENEFITS OF BREATH BITES FOR DOGS

- ⊕ Reduces foul breath
- ⊕ Reduces fecal odor
- ⊕ Helps maintain normal conditions within the intestines

ABOUT OUR INGREDIENTS

- ⊕ Spirulina is a very good source of chlorophyll, a biomolecule that helps support healthy waste elimination with a beneficial deodorizing effect.
- ⊕ Parsley is an excellent source of chlorophyll.
- ⊕ Champignon Mushroom Extract (Champex™ brand) has been studied extensively for its ability to reduce odors and improve intestinal conditions. It has been shown to stop foul breath at the source in the intestines. Champex™ attacks foul breath and body odors where they originate, supporting and maintaining a clean condition within the intestines by suppressing the generation of foul chemicals.
- ⊕ *Yucca schidigera* Extract has been shown to reduce the intensity of fecal odor in dogs by either altering the production or decreasing availability of hydrogen sulfide.
- ⊕ Cinnamon Powder supports a healthy bacterial balance in the mouth.

WHY BAD BREATH IN DOGS:

There are two major causes of mouth odors. The first is decaying food debris between the teeth on the mucous membrane or in the esophagus. The second is when foul smelling compounds are absorbed from the intestinal tract into the blood and then exhaled from the lungs as stink.

WHY FECAL ODOR IN DOGS:

More than 100 trillion bacteria exist in the intestines to help break down food and nutrients. As proteins and fats in ingested food decompose, they create foul-smelling chemicals. Major purification bacteria are *Welch bacillus* and *Escherichia coli*, which create foul smelling intestinal chemicals. Fecal odors originate in this process of breaking down and by means of these putrid chemicals.

Product Facts:

Active Ingredients Per 1 Chew:

Spirulina	100 mg
yielding Chlorophyll2 mg
Parsley70 mg
Champignon Mushroom Extract (Champex™ brand)30 mg
<i>Yucca schidigera</i> Extract	10 mg
Cinnamon Powder	10 mg

Inactive Ingredients: brewers yeast, calcium sulfate, canola oil, chicken liver flavor, citric acid, glycerin, maltodextrin, mixed tocopherols, propionic acid, rosemary extract, silicon dioxide, sodium alginate, soy lecithin, vegetable oil.

FOR ALL DOGS

Directions for Use:

Give 1 chew per 50 lbs daily.

For best results use daily and give between meals.
