

# LAWN AID FOR DOGS

PREVENTS LAWN DISCOLORATION CAUSED BY FREQUENT URINATION

## WHY IT WORKS

- ⊕ **Yucca Extract** – Reduces odors by altering the production or availability of hydrogen sulfide
- ⊕ **Cranberry** – Supports normal urine pH
- ⊕ **Methionine** – An amino acid that helps maintain normal ammonia production- the chemical that can cause lawn burn

### FOR HEALTHY URINE PH

**LAWN AID** is a daily formula to prevent unsightly lawn spots. It is specially designed to help reduce ammonia and nitrogen concentration in the urine that can cause burn. **LAWN AID** is also designed to support bladder and urinary tract health. Taste test reveal 97% palatability!

#### LAWN AID is designed to:

- ⊕ Help with lawn discoloration caused by nitrogen burn in canine urine.
- ⊕ Helps support normal ammonia and nitrogen content in the urine.
- ⊕ Supports bladder and urinary tract health

#### DOGS, URINE AND LAWN BURN:

- ⊕ Lawn burn is caused by nitrogen in dog urine.
- ⊕ Urine contains a high level of Urea products.
- ⊕ Urea has the highest concentration of nitrogen for all solid nitrogenous fertilizers in common use. Nitrogen waste products are the result of normal protein break down in the body and are responsible for the lawn burn.
- ⊕ Female dogs are more likely to cause lawn burn because they empty the entire bladder in one location instead of lifting their leg and marking like males.
- ⊕ Large dogs increase the quantity of nitrogen in one location due to large urine deposits and are more likely to cause lawn burn.
- ⊕ The primary goal when trying to reduce urine damage to lawns is to minimize the nitrogen concentration in the urine.

#### ABOUT THE FORMULA

- ⊕ Methionine is an amino acid that helps manage normal ammonia.
- ⊕ Brewer's yeast contains B vitamins for a light diuretic effect. The B vitamins may help to increase urination frequency and lower the nitrogen concentration. Lower nitrogen concentration may help fertilize the lawn rather than give the lawn a nitrogen burn or "dog spot."
- ⊕ *Yucca schidigera* is an herb that binds ammonia, which helps to reduce the nitrogen burn effect caused by urine.
- ⊕ Cranberry Extract is an herb that helps to maintain urinary tract health.

#### Product Facts:

##### Active Ingredients Per Chew:

Brewers Yeast	300 mg
Methionine	150 mg
Cranberry Powder	50 mg
<i>Yucca schidigera</i>	50 mg

**Inactive Ingredients:** brewers yeast, calcium sulfate, chicken liver flavor, citric acid, glycerin, maltodextrin, mixed tocopherols, propionic acid, rosemary extract, silicon dioxide, sodium alginate, soy lecithin, vegetable oil, whey.

FOR ALL DOGS

#### Directions for Use:

Give 1 chew per 20 lbs of body weight, daily.
