

HIP+JOINT FOR DOGS

An advanced formula containing glucosamine, MSM & chondroitin

HIP+JOINT is a comprehensive formula for the support of joint structure, function and flexibility in dogs six months of age and older.

HIP+JOINT offers a strong line of defense whether your goal is to support the joint structure and function of a healthy pet, or to help maintain the flexibility and joint comfort in an older pet.

HIP+JOINT is recommended for:

- Dogs with an advanced need of joint support
- Geriatric, retired, working or sporting breeds
- Dogs predisposed to joint and connective tissue stress

Because age, breed, diet, lifestyle, injury, and stress can affect joint health, **HIP+JOINT** chews are designed to meet the needs of your dog! The synergistic combination of ingredients optimizes your dog's joint function and comfort; while at the same time providing building blocks necessary to support normal joint structure.

ABOUT THE FORMULA:

- Glucosamine supports the production of chondroitin sulfates and hyaluronic acid which are glycosaminoglycans that support joint comfort, flexibility and mobility for stressed joints.

ABOUT THE FORMULA CONT:

- Methylsulfonylmethane (MSM) is a source of organic sulfur. Sulfur supports proper maintenance of connective tissue function.
- Chondroitin sulfates support the proper structure and function of healthy connective tissues and joints.
- Vitamin C and manganese are required for the production of collagen and for the production of glycosaminoglycans like chondroitin sulfates and hyaluronic acid. As an antioxidant, vitamin C also protects tissues from free radical damage.
- N, N-Dimethylglycine (DMG) supports the production of many constituents in the body, and acts as an antioxidant to protect the joints from free radical damage.
- Omega-3 fatty acids, eicosapentaenoic acid (EPA) and Docosahexaenoic acid (DHA) from fish oil, are precursors to the PGE3 series of prostaglandins. Prostaglandins are substances to support joint comfort and proper body regulation. Fish oil balances prostaglandins and leukotrienes to support joint and connective tissue health.

Active Ingredients Per 2 Chews:

Glucosamine HCl (Shrimp and Crab)	750 mg
Methylsulfonylmethane (MSM)	400 mg
Chondroitin Sulfate (Porcine)	400 mg
Ascorbic Acid (Vitamin C)	100 mg
N,N-Dimethylglycine HCl (DMG)	100 mg
Eicosapentaenoic Acid (EPA)	18 mg
Docosahexaenoic Acid (DHA)	12 mg
Manganese (Mn Proteinates)	5 mg

Inactive Ingredients: arabic gum, brewers yeast, calcium sulfate, chicken liver flavor, citric acid, citrus pectin, fish oil, glycerin, ground oat groats, ground rye groats, maltodextrin, mixed tocopherols, oat meal, propionic acid, rosemary extract, silicon dioxide, sodium alginate, sorbic acid, soy lecithin, vegetable oil, water.

Directions for Use:

Up to 25 lbs:	1 chew daily.
25 - 75 lbs:	2 - 3 chews daily.
Over 75 lbs:	4 - 6 chews daily.

If giving more than 1 chew, divide between AM and PM. For quicker results, double the recommended amounts above for the first 6 weeks.
