BAD HAIR DAY?
SKIN+COAT for dogs supports a luxurious coat and supports normal shedding. This tasty treat is recommended for dogs of all sizes, breeds, and ages. It is the perfect product for dogs with common food sensitivities.

ABOUT THE FORMULA
SKIN+COAT contains 14 ingredients specific to skin and coat health in dogs.

- Flax seeds are rich in ALA (alpha-linolenic acid), an omega-3 fatty acid that helps support skin comfort. Flax seeds also contain lignans, which may have antioxidant properties, as well as vitamins B1, B2, C, E, and beta-carotene, and minerals like iron, zinc, potassium, magnesium, phosphorus, and calcium.

- Safflower oil is an excellent source of linoleic acid (omega-6 fatty acid), which supports skin tone and elasticity. Linoleic Acid is an essential fatty acid needed by the skin and supports the texture and luster of the coat. Incorporation of fatty acids into cell membranes supports the structural integrity of the skin and coat.

- Vitamin E is essential for skin health. It is an antioxidant that neutralizes free radicals that could damage skin.

- A veggie blend of dried carrots, dried alfalfa, and dried kelp are wholesome sources of nutrients that are important for skin health. Kelp and alfalfa support mineral balance which is necessary for good skin tone.

Feeding Directions:
Feed 1 chew per 25 lbs body weight, daily.

Guaranteed Analysis Represents Minimum Levels Per Chew (3.5g):
- Crude Protein (min) 19.0%
- Crude Fat (min) 12.0%
- Crude Fiber (max) 9.0%
- Moisture (max) 10.0%
- Linoleic Acid (min 3.7%) 130 mg
- Vitamin E (min 14000 IU/kg) 50 IU
- *Omega 3 Fatty Acids (min 1%) 38 mg
- *Omega 9 Fatty Acids (min 1.4%) 50 mg

*Not recognized as an essential nutrient by the AAFCO Dog Food Nutrient Profiles.
